

## TIG200A DC MMA

### KEY FEATURES

- Having the function of auto-protection against over-voltage and over-current
- Based on the inverter technology. With the function of TIG and ARC
- Easy to start the arg, with stable welding current; reacting fast; with no noise, little spatter and little magnetic bias to make welding seam beautiful
- Reliable and energy-saving. Convenient to take around with small dimension and weight
- Suitable for the welding of stainless steel, carbon steel, copper etc.

TIG200A equipped with powerful MOS components and three PCB for improved efficiency and maintenance.

The Rivcen TIG200A with high frequency starting also offers MMA functionality making it an ideal choice for maintenance or manufacturing.

### TECHNICAL DATA

Input Voltage (V)	AC220V-50/60Hz
Rated Input Power (KW)	9.6/6.2
Rated Input Current (A)	43.6/28
Current Range (A)	10-200
Rated Output Voltage (V)	28/18
No-load Loss (W)	40
No-load Voltage (V)	56
Duty Cycle (%)	60
Protection/Insulation Grade	IP21S/F
Dimension (L*W*H mm)	153X400X291
Net Weight (KG)	9

### STANDARD ACCESSORIES

- 4M TIG torch WP-26
- 3M Electrode holder 25mm<sup>2</sup>,300A
- 3M Earth clamp 25mm<sup>2</sup>,300A

- 3M Gas hose
- 4pcs hose clamp

### OPTIONAL

- Welding helmet
- Argon regulator
- Welding glove

MMA

TIG

MIG

PLASMA

SPECIAL WELDER
